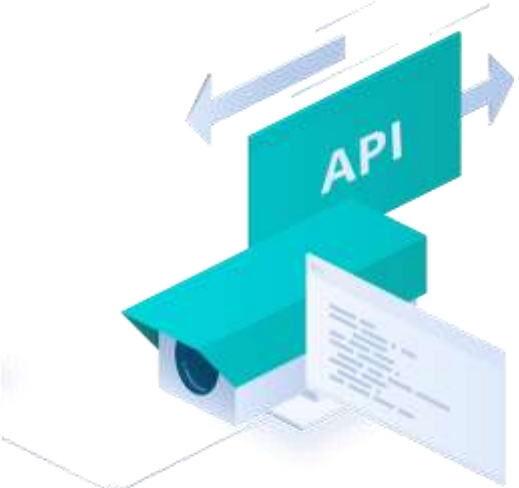
- Security / Surveillance
- Parks & Nature
- Industrial & Security
- Health Care & Analytics
- Casinos
- Entertainment
- … anyone who wants to stream

CamScripter App



Available for AXIS cameras (and also Raspberry Pi)

CamScripter App

- JavaScript code interpreter runs on the camera (or RPi) and makes it possible to render your own overlay graphics based on external data or automate your streaming tasks
- We also offer custom development to integrate any system with CamScripter & CamOverlay

Insert data from temperature sensors and counter machines to the video stream.

See who's just come in - insert data from your access system to video.

Connect data from your internal systems and insert them into video. Then you can stream online or use it securely in your VMS.

CamScripter App Implementation Examples

The power of CamOverlay + CamScripter

Displaying data from an electronic scale in video from an IP camera

Use case: Solution | Apps: CamStreamer App, CamOverlay App
Segment: Security & industry applications
Keywords: integration, electronic scale, display data, external data, rs232, converter

Download PDF | Demo video | Setup video

GitHub

Node.js

Integration with AXIS A1001 Network Door Controller

Use case: Solution | Apps: CamOverlay App, CamScripter App
Segment: Security & industry applications
Keywords: embedded graphics, access system, control room, integration, demo example
